

I am writing to protest the FCC Fax Ban. You people must have rocks in your heads, are you trying to destroy small business in the USA? This ban is moronic, there are already checks and balances, in that if I fax someone, and they respond to remove, I remove them, because I don't want to spend money to send something to someone that can't use my businesses services! I have over 10K customers on my mailing list, what am I supposed to do with 10,000 pieces of paper with their ok to send? Who pays for the cost of fax mailing them the request, and who pays for their replies? Plus what about email spam and the shit I get in my mail box everyday? You are discriminating against faxmail! We throw it out or delete it! Duh, we don't need Colins son telling us how to contact our customers!
